SUMMARY

Web developer with proven remote experience delivering production SaaS features for an international team. Specializes in modular, maintainable applications with Nuxt and Laravel, having shipped dynamic form builders, analytics modules, and AI integrations on a live platform. Pairs clean UI/UX instincts with a focus on performance and async collaboration across time zones, using an AI-assisted workflow to accelerate delivery without sacrificing code quality.

WORK EXPERIENCE

Web Developer

2025 – 2026

AWORK A/S — Denmark (Remote)

CitizenOne — app.citizenone.dk

- **Engineered** a configurable form builder (Dynamic Forms) on Nuxt; owned the full feature from schema design to UI; enabling end-users to create their own forms on the fly without rigid predefined templates.
- **Developed** an engagement-tracking analytics module from presence and absence records; took sole responsibility for the data model; surfacing per-user growth insights for the team.
- **Integrated** bring-your-own AI provider support via personal API keys; designed and owned the credential flow; giving users full control over their AI provider in production.
- **Built** a centralized notification system across app activities; owned the architecture end-to-end; keeping users informed of expired follow-ups, journal notes, and more in real time.

Obiyen — app.obiyen.com

- **Executed** systematic QA testing across the platform; owned defect documentation and reproduction; surfacing bugs the development team subsequently patched.

FarmCo-Pal — app.farmco-pal.com

- **Engineered** a flexible bookkeeping engine (Dynamic Bookkeeping) on Nuxt and Laravel; architected and owned the data layer; recording cooperative transactions accurately across isolated tenants.
- **Developed** cooperative service and member management modules; owned the CRUD and workflow logic; streamlining day-to-day administration for each tenant.
- **Implemented** role-based access control (RBAC) across the platform; took responsibility for permission design; enforcing secure, role-scoped access for every member type.
- **Built** a financial statistics dashboard with MySQL-backed aggregation; owned the metrics pipeline; giving cooperatives actionable visibility into their finances.

IT Support Technician

2022 – 2026

Hulid Elementary School — Philippines

- **Maintained** and upgraded desktops and peripherals across school systems; owned the hardware lifecycle; keeping equipment operational for staff.
- **Diagnosed** connectivity, hardware, and software failures as first responder; owned issue resolution end-to-end; minimizing downtime for users.
- **Restored** failed workstations by reformatting machines and cloning drives; took charge of recovery procedures; returning systems to full operation.
- **Deployed** and configured workstations for teaching and administrative staff; owned end-to-end setup; making users productive from day one.

TECHNICAL SKILLS

Frontend	HTML, CSS, JavaScript, Vue.js, Nuxt, REST API
Backend	PHP, Laravel, Node.js, MySQL
Design	Figma, Adobe Illustrator
Tools	Git, GitHub, VS Code, Claude Code, ChatGPT Codex

EDUCATION

BS Information Technology

2022 – 2026

STI College Davao — Davao City, Philippines

Senior High School — STEM

2020 – 2022

Davao City National High School — Davao City, Philippines
